Address
Lahore, Pakistan

Professional Summary

Senior Unity Game Developer with 6+ years of professional experience architecting and delivering cutting-edge multiplayer, AR/VR, simulation, and mobile games for international clients. Deep technical expertise in advanced networking (Fusion 2, Photon, Mirror), WebGL deployment, and custom SDK architecture. Proven track record of spearheading device optimization for high performance across platforms and leading multidisciplinary technical development teams through full project lifecycles.

Professional Experience

Senior Unity Developer

July 2024 - Present Lahore

Freelance Contractor — Remote

Delivering high-quality multiplayer, AR/VR, simulation, and performance-optimized games tailored to international client requirements, this role involves implementing real-time multiplayer synchronization utilizing Fusion 2 (Shared, Host/Client, Server/Client), Photon PUN 2, and Mirror networking frameworks. Additionally, it entails developing immersive AR/VR applications featuring complex gameplay systems and advanced card logic for TCG (Trading Card Game) engine-based titles, alongside integrating third-party monetization suites (AppLovin, AdMob, Unity Ads) and engineering modular, reusable SDKs for seamless client-side integration.

Senior Unity Developer

Oct 2023 - July 2024 Lahore

ArhamSoft (Pvt) Ltd

Engineered Metaverse products completely from scratch, featuring fully persistent virtual environments and interactive, dynamic avatars. Integrated advanced Augmented Reality (AR) features and scalable real-time multiplayer systems to boost user engagement. Developed and maintained custom Firebase backend pipelines to handle data syncing, authentication, and cloud storage. Architected and implemented robust SDK frameworks to streamline feature integration and cross-platform compatibility.

Lead Unity Developer

Jun 2022 - Oct 2023 Lahore

Penandweb (PVT) LTD.

Directed and mentored technical development teams across multiple concurrent, cross-platform game productions. Engineered high-performance multiplayer WebGL 3D games featuring secure blockchain integrations, utilizing Mirror and Photon networking frameworks. Developed, performance-optimized, and successfully deployed immersive 3D games targeted for the Google Play Store and Apple iOS App Store.

Lead Unity Developer

Jun 2021 - May 2022 Lahore

DevBatch

Led the engineering team, planned technical roadmaps, and managed project milestone delivery schedules to ensure on-time release. Architected high-performance multiplayer, 3D simulation, and shooting games equipped with responsive, fluid control mechanics. Managed end-to-end store release operations and publishing pipelines for the Google Play Store and iOS App Store.

Jr Unity 3D Developer

Aug 2019 - May 2021 Lahore

Mizo Studio

Developed diverse 3D game projects including robotics and architectural house design titles. Implemented complex gameplay features including NavMesh pathfinding, joints, Unity physics, Animator controllers, and intelligent enemy AI. Conducted rigorous runtime profiling and optimization (Canvas, Particle Systems, terrain, textures) to successfully reduce APK sizes.

Education

Lahore Garrison University

BS Computer Sciences (Hons)

Virtual University

PGD IT (1 Year) Degree

Specialization

- -Multiplayer Synchronization
- -Technical Team Leadership
- -Store Management (iOS/Android)
- -AR/VR & Metaverse Platforms
- -Multiplatform Optimization

Skills

Unity 2D / 3D & C#

Fusion 2 (Shared, Host, Server)

Photon PUN 2 & Mirror

Fish-Networking

AR/VR XR Development

WebGL & Blockchain

Profiling & Optimization

NavMesh & AI Systems

AppLovin, AdMob & Unity Ads

Custom SDK Development

App Store & Play Store Deploy

Tools

Game Engines:

Unity (Unity 6, 2022 LTS),

Universal Render Pipeline (URP),

Shader Graph

Languages & IDEs:

C#, Visual Studio,

Visual Studio Code,

JetBrains Rider

Version Control:

Git, GitHub,

Unity Version Control (Plastic SCM)

Project Management:

Jira, Trello,
